

Isn't it time you consolidated your Drug Residues Testing?

Randox present the worlds only multi-analyte semi-quantitative Drug Residue analyser.

Using Biochip Array Technology allows simultaneous detection of multiple analytes from a single sample.

Antimicrobial Array II

Ceftiofur
Thiamphenicol
Quinolones
Streptomycin
Tetracyclines
Tylosin

Antimicrobial Array I

Sulphachlorpyridazine
Sulphadiazine
Sulphadimethoxine
Sulphadoxine
Sulphamerazine
Sulphamethazine
Sulphamethizole
Sulphamethoxazole
Sulphamethoxyipyridazine
Sulphamonomethoxine
Sulphapyridine
Sulphaquinoxaline
Sulphathiazole
Sulphisoxazole
Trimethoprim

Antimicrobial Array III

AHD
AMOX
AOZ
SEM
Chloramphenicol

Multiplex screening for Veterinary Drug Residues

The ultimate cost saving Drug Residue Screening solution

Key Benefits:

- Cost Savings
- High Quality
- Minimal Consumable Costs
- Less Labour
- Faster Turnaround Time
- Higher Throughput
- 57 Target Screens
- 1 Simple Protocol
- >65 New Tests in Development
- Consolidation of Tests on the Same Platform
