

## What does ELISA screening mean for you in your business?

Using the Randox Drug Residues ELISA kits it will represent:

**E**xcellent limits of detection

**L**ow labour intensity

**I**ntra and inter assay precision levels of <10%

**S**imple sample preparations

**A**ntibodies of excellent generic nature

**Randox ELISA kits** allow screening of a wide range of drug residues including antibiotics, growth promoting steroids and drugs of abuse in various matrices.

Simple sample preparations are available for honey, feed, tissue, milk, prawn/shrimp, urine and other matrices such as eggs, hair and feather.

If a particular matrix is not available advice and/or development can be supplied.

ELISA

### ELISA Screening Benefits:

- Fast (40 samples in approx. 90 mins)
- Easy to use
- Lower set up costs
- Semi-quantitative concentrations obtained
- Simple sample preparation
- Highly specific
- Minimum technical expertise
- Low number of consumables
- No service costs

Randox ELISA Kit Product Range	
Antimicrobials	<a href="#">Sulphaquinoxaline</a> <a href="#">Sulphadiazine</a> <a href="#">Sulphamethazine</a> <a href="#">Sulphamethoxazole</a> <a href="#">Chloramphenicol</a> <a href="#">Beta-lactams</a> <a href="#">Quinolones, Flumequine</a> <a href="#">Nitrofurans (AOZ, AMOZ, AHD, SEM)</a> <a href="#">Streptomycin</a> Tetracycline*
Growth Promoting Steroids	<a href="#">Trenbolone</a> , <a href="#">19 Nortestosterone</a> <a href="#">Boldenone, Stanozolol</a> <a href="#">Beta Agonist, Clenbuterol</a> <a href="#">Ractopamine</a> <a href="#">Corticosteroids</a> <a href="#">Phenylbutazone, Flunixin</a> <a href="#">Stilbenes, Zeranol</a>
Drugs of Abuse	<a href="#">Ketamine</a>
Tri-phenylmethane Dyes	<a href="#">Leucomalachite Green</a>
